<sup>1</sup> Equals the current-dollar statistical discrepancy deflated by the implicit price deflator for gross domestic business product.<sup>2</sup> Equals gross domestic product (GDP) less the statistical discrepancy and the sum of GDP by industry of the detailed industries. The value of not allocated by industry reflects the nonadditivity of chained-dollar estimates and the differences in source data used to estimate real GDP by industry and the expenditures measure of real GDP.Note.—For details regarding these data, see *Survey of Current Business*, June 2000 and November 2001 and 2002.
